Improved Permitting Services & Inspections

"...Northumberland County is located within south east ON, Canada along Highway 401. Noratek has provided us with the City Reporter software program, one of the most important tools in the Plumbing and Septic Inspectors tool belt. It is utilized by our staff to create new permits, track permit inspections and store completed records for endless years to come. We are continuously creating new ways with the help of the Noratek Team to improve our services to the public and increase our accessibility to them. Utilizing a new portal for public on-line access provides full access and transparency to the applicant to create, pay and track progress of their own permits including providing a filing system to track all their permits. This program is very easy to modify without the help of a full IT team, to our needs to improve our services keeping us on the cutting edge of technology available to our industry. We highly recommend City Reporter for all building inspection departments...."

Kirk Johnstone CPSI, CBCO

Senior Plumbing and Sewage System Inspector

600 William St., Cobourg, Northumberland County

Save time! Use our new online portal to submit your septic permit applications.
