City Reporter

Mr. John Ortensky

ETMC is a satisfied user of the City Reporter software for five years and is looking forward to another five years of eliminating paper work and providing our customers with documentation that can be counted on. Our team members now have an easy way to document their work and also provide evidence of what they have done. City Reporter now lets us track assets and inspections and document what is and has been done. City Reporter is a key element in our work activities as well as tracking

Frank Horton

ETMC, Project Manager

Roads and Grounds for the Department of Energy
